

COMMUNICATION TOOLS

Reach your users in real-time

MailBlast

Send an email to all your registered members or to a group of them in a few easy steps.

Choose from beautifully crafted email templates, customize your text and images, select your recipient and schedule a time for sending out the mailer.

Track your email campaign statistics in real-time, including the number delivered, opens and clicks on links. Get comprehensive deliverability reports and assess the effectiveness and ROI of your mass mails.

Thanks to our distributed cloud infrastructure, there is no limit to how many recipients you can reach.

Alerts

You don't even have to login in order to track the usage progress and trends! Simply subscribe to the various alerts available and receive the updates on a daily/weekly basis

There are many alerts to choose from, including usage summaries, user activity, important KPI trends, and responses to service forms, surveys and requests for content.

Real-time Chat Service

Fully customizable chat service with an unlimited number of agents and simultaneous conversations.

Automated email validation Service

The email validation service works in the background and checks the reliability of each and every email contact available. It will make sure to exclude expired emails in order to maximize deliverability rates and the reliability of the Mail out service.

Get full comprehensive reports and unlimited history on every single transactional and bulk email that was sent.
