

# ROI BETA

*An automated tool to calculate return on investment and cost benefit figures for resources*

## Statistics

Compare against costs and analyze resources based on what your users like and use most.

Through Statistics, the admin can get the Top 20 report for:

- ▶ Most Cost Effective Resources
- ▶ Resources Cost per Hit
- ▶ Least Cost Effective Resources
- ▶ Resource Cost Per Hit
- ▶ Monthly Spend Vs Budget

## Compare Resources

Select any of the available resources on the drop down list and compare it with another resource, (the comparison is only applicable between resources of same category). This helps the admin deciding which resource to eliminate and which to keep.

## Manage Cost

(Usage x price per article or book)

Look up the cost of all subscriptions, active or inactive as well as the possibility of adding new subscription costs.

## Setting

Currently, the available currency of the ROI is US dollars. DeepKnowledge will add more currencies in the future. Each institute can change the calendar setting to coincide with their fiscal year.
